## Math 262 Reading Guide

1. Give an example of a binomial experiment that is not one of the experiments given in Examples 2.27 2.30 .
2. What is the definition of a binomial random variable?
3. What is the meaning of $b(3 ; 4, p)$ ?
4. Let $X \sim \operatorname{Bin}(n, p)$, meaning that $X$ is a binomial random variable with parameters $n$ and $p$. What are $E(X), \operatorname{Var}(X)$, and $\operatorname{SD}(X) ?$
